WP

Thanks for taking time to participate in our prescreening survey.

This is a short prescreening survey for an upcoming study. If you qualify for the study, then you will be invited to participate on the second stage.

Sincerely,
The Study team

End of Block: Screening Questions

Start of Block: Software Quality

SWQ.1 Throughout this survey we will be asking questions related to software quality. We use ISO/IEC 25010 definition of software quality, which states: “[Software quality is] the degree to which the system satisfies the stated and implied needs of its various stakeholders, and thus provides value”. This ISO model also covers some non-functional characteristics, mainly, “performance “,” compatibility”, ”usability”, ”reliability”, “security”, ”maintainability”, and “portability.” Do you agree with this definition?

- ☐ Strongly disagree
- ☐ Somewhat disagree
- ☐ Neither agree nor disagree
- ☐ Somewhat agree
- ☐ Strongly agree

SWQ.2 Please, discuss your response below:
